

SPACEPOLE POINT OF SALE at a glance

The traditional static point of sale is, and will remain, a feature of the bricks and mortar store for years to come. Therefore, to ensure that the customer experience is a positive one, these customer engagement points must deliver fast and dependable operation, be accessible for all and provide an ergonomic, productive workstation for the operator.

SPACEPOLE ESSENTIALS®

Our SpacePole Essentials range of technology mounting solutions create space-saving and ergonomic work stations that improve operator productivity.

The Essentials range was created to work with existing hardware and furniture and offers robust ergonomically designed mounting solutions. With over 7 million installations worldwide, our signature product range is the mounting solution of choice for today's leading retail organisations.

Modular, upgradeable and ergonomic, SpacePole Essentials are designed to last. They are also easy to upgrade should the hardware change. Our VESA mounts mean that should a screen be swapped, there is no need to change the SpacePole mounting solution itself.

Likewise, technology may be added to an existing point of sale. This again is easy to adapt to the existing configuration. Our new Height Adjustable VESA Screen Mount provides a very simple solution to a well known ergonomic issue for operators, everywhere.

ESSENTIALS OPTIONS

- ▶ Screen mount
- ▶ Screen top mount
- ▶ Back-to-back
- ▶ Swingarm
- ▶ Height adjustable
- ▶ Elbow arm
- ▶ Wall mount - angled
- ▶ Wall mount - straight
- ▶ Floor mount

SPACEPOLE TABLET-BASED POS at a glance

Cloud based point of sale solutions have revolutionised the retail space. They answer the need for high functionality software based upon consumer grade tablets. Ensuring that these solutions deliver day in day out is key. Cool in design and with an ease of use second to none, when matched to our X-Frame, A-Frame or TabPrint products, TabletPOS delivers.

SPACEPOLE A-FRAME™

Secure, good looking and so simple to set up, A-Frame delivers a sleek point of sale. For designer outlets, fashion and speciality goods, this is the number one choice. Desk, floor, or wall mounted, A-Frame is also perfect for a wide range of assisted or stand-alone applications and is already in use across the globe for TabletPOS and customer sign-in. Kensington push-lock provides security and a key management service is available.

APPLICATIONS

- ▶ In-store pop-up
- ▶ Front of house
- ▶ Speciality retail
- ▶ Event merchandising
- ▶ Fast food restaurants
- ▶ Product look up

SPACEPOLE C-FRAME™

This popular enclosure works well for desk mounted applications and is equally at home when at the heart of a TabletPOS solution with cash drawer wrap.

SPACEPOLE TABPRINT™

TabPrint is a stylish mount for incorporating a printer and tablet enclosure in a compact solution with a small footprint and great cable management. TabPrint is designed to be used in combination with our A-Frame and X-Frame tablet enclosures.
