WT6300 Wearable Computer

The Ultimate Industrial Wearable Computer for Hands-Free Mobility

With the explosion of ecommerce, picking and sorting have become full time jobs, not only in the warehouse, but in the retail store where orders placed online need to be ready for pick up in as little as two hours. Now customers can empower their workers to keep pace with exploding ecommerce demand. Our hands-free WT6300 builds on our WT6000, offering new features that take productivity and order accuracy to the next level.

The WT6300 features a new keypad option that provides a familiar interface for manual keyed input. It delivers lightning fast application performance with more processing power, RAM and Flash memory than the WT6000. The WT6300 runs Android™ 10, with a pathway to Android 11, to deliver superior future proofing. It is rugged and ready for the toughest environments, including the freezer. Improved WiFi support delivers 'no-drop' dependable connections and users get maximum Bluetooth peripheral performance and range with Bluetooth 5.0 Class 1 support. Connect a Bluetooth ring scanner and HD4000 Head-Mounted Display for a complete solution. Plus, users can capture images via a paired Zebra ring scanner to document proof of condition on-the-fly.

Unlike the competition, the WT6300 is purpose built for ergonomic hands-free operation. Maximum comfort and durability mean ultimate worker productivity—and a business that can keep up with market demand.

WT6300 Wearable Computer

Innovative Features of the WT6300 Wearable Computer

Superior ergonomics for all-day hands-free comfort

Purpose-built for wearable hands-free use, the WT6300 mounts comfortably on either wrist. Lightweight with a low centre of gravity, it minimizes muscle effort and worker fatigue. Our best-in-class mounting system with micro-adjustability enables a perfect custom fit on virtually any arm. Also, our display automatically detects gloves and adjusts touch sensitivity as needed, supporting common gestures such as pinch-to-zoom and swipe.

Rugged industrial design for all-day use—in any environment

The WT6300 is dustproof, water-resistant and built to handle the inevitable everyday bumps and drops. Gorilla® Glass delivers scratch and shatter resistance on the most crucial and vulnerable device component—the touchscreen display. The screen works even when wet. The WT6300 is the only device in its class rated for freezer use, with a battery rated for operation at -22°F/-30°C. Plus, it is drop-tested across the entire temperature range—critical in freezer environments where plastics become very brittle.

Optional keypad attachment to support key-based applications

With the phase-out support for Microsoft's Windows® CE, customers need a new device to ensure continuity of operations. The WT6300 keypad option makes it easy to migrate to Android™. Customers don't need to change the look and feel of their application screens or user workflows, minimizing disruption and retraining. The keypad also eliminates the need for an on-screen soft keyboard, making the entire WT6300 display available for information-rich business applications.

WT6300 Wearable Computer

Innovative Features of the WT6300 Wearable Computer

Zebra's most powerful 'ultimate series' Android™ platform—for a future-proof solution

Our advanced processor delivers desktop-like performance on even the most demanding applications, all with less power consumption for longer battery cycle times. Customers gain a future-proof device with Android 10 and a pathway to Android 11, as well as a device lifetime of up to ten years (available for five years; serviceable for another five years). If customers already have or are planning to purchase other Zebra devices, the shared platform will streamline device deployment, management and support.

Backward compatibility with WT6000 accessories to protect investments and ease upgrades

Customers can upgrade from the WT6000 to the next generation in wearable mobile computers and use any of their WT6000 accessories with the WT6300, including batteries, cradles, ring scanners, cables and headsets.

Convenient, industry-leading image and data capture with Zebra ring scanners

Workers gain superior scanning of virtually any barcode in any condition with a Zebra ring scanner. With Multi-Barcode Scanning, a complimentary Mobility DNA app, workers can scan multiple barcodes on an item or pallet with a single press of the scan trigger—no need to remember the correct scanning order or cover up nearby barcodes. What's more, a paired Zebra Bluetooth ring scanner can capture photos for indisputable proof of condition—such as an incoming pallet with ripped shrink wrap or a returned item that is damaged.

WT6300 Wearable Computer Services Opportunities

Zebra OneCare™ Support Services

Constant peak performance and device uptime. That's the upside of protecting your customers' device investment with Zebra OneCare™ support services. Ensure your customers' devices are online and ready for business, ensuring critical business processes and operations are performing at peak levels while also reducing device vulnerabilities, eliminating unexpected disruptions and unbudgeted repair expenses.

Without a service plan, a single repair can potentially cost more than the device and can take weeks to complete. Increase device uptime and avoid unbudgeted repair costs with Zebra OneCare. With Zebra OneCare, we help ensure the device is online and ready for business, ensuring critical business processes and operations are performing at peak levels.

Zebra OneCare™ Essential:

- Technical Support: 8x5 local time live-agent technical support available in 17 languages.
- Software Support: Access to software/firmware updates and upgrades including LifeGuard™ security updates.
- [Device Diagnostic Tool](#) for device self-diagnosis.
- Repair Services: 3-day depot repair turn-around.
- VisibilityIQ™ OneCare™: cloud-based tool for visibility into contracts, tech support cases, LifeGuard Analytics report, and repair data including repair lifecycle, on-time delivery, repair return rate, repair repeat and top repair metrics.

Zebra OneCare™ Select:

Includes all of the features in Essential plus:

- Tech Support: [24/7 live agent support](#).
- Repair: Advance exchange of like new device, delivered next business day.
- Commissioning: Includes commissioning of devices with software, apps and OS level so devices are ready to go right out of the box.
- [Learn more about Zebra OneCare™ Services](#)

Zebra Video on Device (VoD):

Zebra's Video on Device (VoD) is an online learning service designed to provide the end user the opportunity to learn anytime and anywhere. The goal of our educational videos and performance support content is to accelerate user adoption, optimize performance and help customers maximize their return on investment (ROI).

Since the WT63000 comes with Android 10 OS, the customer automatically benefits from a pre-loaded basic version of VoD that provides a secure way to educate associates on:

- Device functionality
- Cleaning and sanitizing
- Trouble shooting
