- Virtual merchandising
- Front-of-house table management
- Self service check-in

BENEFITS

- Designed specifically for Apple iPads
- Elegant, yet robust design
- Quick and simple installation
- Easy tablet removal
- Internal cable management
- Optional 180 degree rotation base
- Wide range of mounting solutions for peripherals available

SpacePole C-Frame - a versatile stand-alone point of sale solution for iPad.

iPads are the devices of choice for many businesses today. Simple to use, understood by all, and at a fraction of the cost of traditional point of sale solutions, they are transforming the way the point of sale looks and operates.

Simple and functional design
With a simple and functional design, the C-Frame is an ideal solution for tablet POS. It is elegant, but still robust. It gives protection to your tablet, but without hiding it and provides the flexibility to give your counter a personal look.

Quick to set up and easy to use
Simply place your iPad and run the cable and you are ready for business within seconds. Great cable management ensures that the installation looks neat and professional. The open design of the C-Frame highlights the apple branding and gives access to the tablet functions, whilst hiding cables. Removing the iPad to use for other purposes is simple: A hinged backplate and a handwheel or security screw, means that this process is quick and easy.
Create it your way
C-Frame is designed to be flexible. We understand your business has its own individual requirements. You may want to add additional security, cash drawer or a rotation base for applications where a customer interaction is needed. C-Frame also accommodates the mounting of a wide range of peripherals directly on to the frame for one integrated space saving point of sale.

Install anywhere, C-Frame provides protection while looking great and enabling your business to deliver exceptional customer service.
