

DS7700 Scanner

High Performance On Counter Scanner

The On Counter Scanner that “Can’t Miss!”

No matter what bar codes appear at your checkout, the DS7708 can scan them all — 1D, 2D, printed and electronic — just as fast as your cashiers can slide items past the scan window.

Compact Size

With its compact design, the DS7708 can easily be installed in even the most space constrained checkout lanes. And extraordinary durability minimizes costs and protects uptime, maximizing device lifecycle and your return on investment.

Superior Durability

The recessed scan window prevents marks and scratches that can degrade scanning performance and lifecycle. In addition, the electronics are located in the top area of the DS7708 to prevent damage and protect uptime in the event of a spill.

Invisible Illumination

Additionally, The LEDs are recessed behind the scan windows, where they are barely visible and won't interfere or disturb the cashier during operation.
